## CONSULTATION REPORT

PATIENT NAME: GREGG C BAIRD  
MEDICAL RECORD NUMBER: V00143826  
ACCOUNT NUMBER: V025536167  
ATTENDING PHYSICIAN: Feroze A Hussain, MD  
CONSULTING PHYSICIAN: Ricardo Lemos, MD  
ROOM #: V.257-1  
DATE OF ADMISSION: 09/06/09

REFERRING PHYSICIAN: Feroze Hussain, MD

REASON FOR CONSULTATION: Hypoxemia and fever in the setting of recent diagnosis of Pneumocystis pneumonia and HIV infection.

HISTORY OF PRESENT ILLNESS: A 38-year-old who I had seen recently in August for chronic pneumonitis and newly diagnosed HIV infection. At the time, patient had DAL with transbronchial biopsy. The pathology of the biopsy showed positive for pneumocystis, no malignancy, no AFB or other fungal pathogens except for Candida albicans, CMV and other respiratory viral cultures were negative. The patient was treated with Bactrim and Medrol and then prednisone with rapid improvement. Genotype was submitted. His viral load was 100,000 and CD4 cell count in the 50s. Patient was discharged on Bactrim and azithromycin, as well as Diflucan to complete a 21-day course in the outpatient setting. Patient developed persistent dyspnea that he was concerned with, as well as recurrence of fever. He also developed diarrhea. He contacted a friend that works at Texas A and M Student Clinic and came to the emergency room. He was readmitted.

On physical examination, vital signs on initial evaluation demonstrated temperature 97, blood pressure 114/63, his pulse oximetry was 99% on 3 L nasal cannula.

LABORATORY DATA: Initial lab work demonstrated a white cell count of 3.1 with hemoglobin 12.5, platelet count 113,000 and 77% segmented neutrophils, 14% bands, 6% lymphocytes. Metabolic panel with a sodium of 126, potassium 3.1, glucose 121, albumin 1.8, AST 50, ALT 78, alkaline phosphatase 89. Arterial blood gas pH 7.45, pCO<sub>2</sub> 32, pO<sub>2</sub> 86 with nasal cannula at 6 L, and hepatitis A and B screens were negative. Two sets of blood cultures are negative so far. Repeat CBC with white cell count 1.9. Platelet count 105,000 with 25% bands.

A chest x-ray demonstrated again the interstitial infiltrates with more prominence in the left side. Technique is somewhat different, but the appearance is very similar to previous findings.

## REVIEW OF SYSTEMS:

GENERAL: Currently he is quite tachypneic at rest, but he feels better than what he did than when he came in the first time around.

HEENT: No headaches. No visual symptoms, sore throat,

4. IT IS THE BELIEF OF THE AFFIANT AND HE HEREBY CHARGES AND ACCUSES THAT IN BRAZOS COUNTY TEXAS: said suspected party committed the offense of Possession of Child Pornography.

then and there intentionally and knowingly possess visual material that visually depicted, and which the defendant knew visually depicted a child who was younger than 18 years of age at the time the image of the child was made, engaging in sexual conduct, to-wit: actual deviate sexual intercourse.

5. AFFIANT HAS PROBABLE CAUSE FOR THE SAID BELIEF BY REASON OF THE FOLLOWING REASON OF THE FOLLOWING FACTS, TO-WIT:

Your Affiant is currently employed as a Detective with the College Station Police Department. Your Affiant has been assigned to College Station Police Department Criminal Investigations Division since 2007, and has investigated numerous types of crimes. Your affiant is a certified Texas Peace Officer with TCLEOSE with a Master Certification. Your affiant has been a peace officer in the State of Texas for over nine years.

Affiant has spoken with other federal agents, peace officers, and investigators with other law enforcement agencies who are knowledgeable regarding the methods and means used by individuals who buy, sell, trade, send, and/or receive child pornography via the Internet and have related their personal knowledge and provided affiant with insights as to the manner evidence of these crimes are obtained and kept. Affiant has personally been involved in numerous investigations into this area of crime.

On May 11, 2009, College Station Police Department Crime Analyst Cabrina Scott received information from Dawn Killian, that she observed child pornography on a computer that she had access to, while "pet sitting" at a residence in College Station. She informed Scott that while on the computer belonging to the person that she was "pet sitting" for, she discovered several images of child pornography. Scott then informed Affiant and Detective David Fallwell of what Killian had reported to her. At the time that Killian first notified Scott of the child pornography that she discovered, she wished to remain anonymous, but wanted to report her findings.

Killian later contacted Affiant by telephone and briefly discussed this case. At the time, Killian was requested to gather additional descriptive information about her findings from what she was able to recall from when she originally found the images. Killian also expressed that she was going to research the possibility of reporting this incident to the Federal Bureau of Investigation, in an attempt to keep her identity anonymous.

On May 13, 2009, Killian met with Detective Fallwell and discussed this case more thoroughly with him. Killian reported that she was house sitting (pet sitting) for Gregg Baird at his residence located at 2009 Ravenstone Loop, in College Station, Texas, while Baird was out of the country. Prior to house sitting for Baird, Killian reported that she had only met Baird twice before. Killian was to house sit for Baird from May 7, 2009 to

May 17, 2009, staying at the house during the period of time that Baird was away. Killian reported that she was told that while she was house sitting, she could "help herself to anything" in the house.

Killian reported that she stayed at the house on May 7, 2009 and May 8, 2009. Killian reported that she did not stay at the residence on May 9, 2009 or May 10, 2009, because the roommate, Andrew Martin, had come home. Killian then again stayed at the residence on May 11, 2009, May 12, 2009, and will be staying at the residence on May 13, 2009. Killian reported that she stayed at the residence on those dates, because Martin again had left the residence. Killian also reported that Martin was scheduled to return to the residence on May 14, 2009.

Killian reported that on May 8, 2009, at approximately 20:30, she got onto the computer in the master bedroom of the residence, which Baird reported to be his room. Killian described the computer as a Dell home tower that is silver/gray in color, and on the floor to the right of the desk that is located in that bedroom. She reported that a thumb drive and external hard drive was also plugged into the computer. At the time that Killian got onto the computer, the computer was in sleep mode. At the time Killian "woke" the computer up, because she was going to download two songs that were on CD's, onto her iPhone.

After Killian accessed the computer to load the two songs onto her iPhone, she realized that she had to log onto her iTunes account. iTunes was already logged onto, and Killian did not want to log off the account that was logged into, so she decided to delete the songs that she had already moved to the desktop of the computer. In the process of deleting the songs, Killian accessed the "recent documents" folder of the computer in order to delete the songs from that folder. While accessing the "recent documents" folder, she observed an estimated eight to ten titles in the "recent documents" folder that had "bad" names. Of the names that she could recall being in the "recent documents" folder, she could recall the names "Emo boy sub," and "younger guy sucks older man."

Killian then access the recycle bin on the computer, so she could finish deleting the songs from the computer. When she accessed the recycle bin, she observed an estimated twenty-four to sixty one inch thumbnail images, some of which she believed contained images of child pornography. Killian described a total of four images that she was able to recall seeing. The first image was described as containing a white male, believed to be approximately thirty to fifty years of age, with salt and pepper colored hair and balding. That male was described as being completely naked, lying down with two boys, possibly Asian, between his legs. The boys were also reported to be completely naked. The two boys were believed to be less than ten years of age because they were estimated to be one fourth the size of the older male, and had no pubic hair.

Killian described the second image as having an adult performing oral sex on a boy. In that image, Killian believed that the boy was a child because of the size of the adults hands compared to the size of the child's hips. In the image, the size of the child's hips were small compared to the size of the adult's hands.

Killian described the size of the third image as an image of a male lying down, holding a child above him, licking the child's anus. The fourth image was described as a child laying on his back, holding his feet up and exposing the child's anus. That image may have also included an arm in the image that was believed to have belonged to a man.

After seeing the images on the computer, Killian left the computer alone. She became concerned about the images that she had seen, and believed that the images were child pornography. She later returned to the computer to look up definitions of child pornography, so she could confirm whether or not the images that she observed were actually child pornography. She reported that while on the computer, she again accessed "recent documents" and opened an image that she did not know the title of. When she opened that image, which was a video, she reported that she observed a person believed to be middle school or high school age, under covers. As the video continued, the covers were thrown off of the person, revealing the person that she believed was a child underneath. Killian reported that that person was naked, and was possibly shaved. After seeing a portion of the video file, she was not able to determine the age of the person in the video file.

Affiant knows from his training and experience that the images such as those described by Killian can easily be transferred to other media such as a CD, memory stick, or flash drive, and such can be transported in an easy fashion. Affiant also knows from training and experience that people who possess sexually explicit materials often possess sexually explicit materials consisting of photographs, magazines, motion pictures, videotapes, books, diskettes, and slides depicting children.

Affiant knows from his training and experience that Child Pornography is visual material of individuals under the age of 18, that depict those individuals engaging in sexual conduct, including but not limited to lewd exhibition of the breasts or genitals, actual sexual intercourse, simulated sexual intercourse, or deviate sexual intercourse.

Affiant has spoken with experts in the field of forensic computer examinations. Because of the large volume of information stored on a computer, it is almost always necessary to examine the computer off-site. A comprehensive forensic examination of a computer may take days or even weeks. Affiant has also learned that experts in the field of computer forensics are able to recover data that has been deleted from a computer hard drive, as well as storage media (floppy disks, compact disks, Zip drives, Pen drives, Thumb drives, tapes, etc.). Affiant also knows from his training and experience that digital material has the capability of remaining on devices designed to store them for an indefinite period of time including weeks, months, and years. Unlike drugs, Child Pornography is not consumed by the user; rather they are stored and kept for an indefinite period of time. The affiant also knows from his training and experience, that it is possible to retrieve items that have been deleted by the user through the use of a forensic recovery of the storage device.

Based on affiant's training and experience, in order to completely and accurately retrieve data maintained in computer hardware or on computer software, to ensure accuracy and completeness of such data, and to prevent the loss of the data either from accidental or

programmed destruction, it is often necessary that computer hard drives be copied and examined by a qualified computer specialist.

Affiant is therefore requesting that a forensic examination of any computer and computer-related media found at the above locations be conducted for evidence of criminal activity, specifically Possession or Promotion of child pornography, and identification of other child victims of sexual exploitation.

If authorized to search the above-described computer(s) hard drive, the forensic analyst will conduct the search within approved forensic guidelines that will safeguard the integrity of the original data stored on the hard drive.

Affiant knows that based on my training and experience that computers store the names of the people the operating system is registered to, as well as the name of the person to whom the programs are registered. Written documents are also often found that bear the name of the person that wrote them. The above information is used for indicia of ownership to establish the identity of person (s) in control of the computer(s).

WHEREFORE , AFFIANT ASKS FOR ISSUANCE OF A WARRANT THAT WILL AUTHORIZE THE SEARCH OF SAID SUSPECTED PLACE FOR SAID PROPERTY AND SEIZE THE SAME.
